Dr Ranga Reddy is Physician, Public Health activist, Educator, Philanthropist and Social Entrepreneur with interest in business verticals of high social impact. He is focused on public health awareness, education and training. He is committed to improvement of Infection Prevention practices and patient safety in India and other low resource settings.

His vision both as Founder President of Infection Control Academy of India and as Honorary Professor of University of Hyderabad is to build robust capacity of Infection Prevention and Control (IPC) cadre for the world from India, especially for resource constrained countries and improve professional practice standards for IPC. He is strong believer of human potential to prevent and overcome the public health emergencies caused by infections.

Many public health and infection prevention professionals globally see him as an individual making a difference in infection prevention. His lifelong work in various fields especially in the field of infection prevention has made a huge difference in the lives of patients, infection control practitioners, healthcare providers and anyone who has ever been in contact with him.

Dr Ranga Reddy collaborated with PHFI, IAMM, UNICEF, ASCI, ACIPC and several other private, public and not for profit organizations to develop IPC programs of various durations. More than 10,000 healthcare workers were trained through programs designed, developed and offered by him with support of likeminded organizations & professionals. He also developed and contributed for COL ECEMCA - sponsored basic infection control e-learning program which has been presented to infection control practitioners and also to those seeking to be initiated into infection prevention practices. He is also the architect of first ever post graduate level diploma program in IPC in India.

Dr Reddy is the founder trustee of Infection Control Academy of India (IFCAI).

He is a recognized healthcare and pharma industry leader with global network and hands on experience in more than 50 countries worldwide. He has flair for entrepreneurship and mentors several NGO's, startups & micro-small enterprises especially in Healthcare segment.
