[LinkedIn profile](#)

Dr. Reddy is a multifaceted professional, serving as a Physician, Public Health Policy Advisor, Academician, Philanthropist, and Social Entrepreneur. His extensive body of work revolves around enhancing public health awareness, education, and training, with a steadfast commitment to improving Infection Prevention practices and patient safety, particularly in low-resource settings such as India.

With a comprehensive perspective spanning the length and breadth of India and other LMICs including Central and Eastern Europe, his overarching vision is to establish standards and frameworks for credentialing infection control professionals. Dr. Reddy has undergone rigorous training in medicine, management, public health, and one health at prestigious institutions, including Minsk State Medical Institute, Pondicherry University, IESE Business School, Washington University, and Calgary University.

As the Founder of the Infection Control Academy of India, Honorary Professor at the University of Hyderabad, Adjunct Professor at the Public Health Foundation, Social Entrepreneur and civil society activist, his mission is to fortify global public health and Infection Prevention capabilities, with a special emphasis on originating these efforts from India. He staunchly believes in Health Equity and the human potential to prevent and overcome public health emergencies caused by infections.

Pioneering India's first-ever post-graduate Infection Prevention and Control program through CDVL at the University of Hyderabad, Dr. Reddy has earned global recognition for his fervour and dedication to preparing the world to effectively counter infections and combat antimicrobial resistance. His initiatives have included sensitizing and training over 10,000 Healthcare Workers in Infection Prevention and Control, with an ambitious goal to build capacity for Infection Preventionists in India and other low- and middle-income countries over the next five years.

He is working as a policy advocate and expert from civil society to build National and State Action plans to contain AMR and update patient safety & IPC guidelines. He is serving as advisor to the Government of Andhra Pradesh for the implementation of the State Action Plan to contain Antimicrobial Resistance.

He received awards from the Telangana Govt and Indian Medical Association for his work in public health and community services.

Dr. Reddy has fostered professional alliances and collaborative activities with esteemed universities and international organizations, including the University of Hyderabad, Sri Satya Institute of Higher Learning, Public Health Foundation of India, SRM University, KLE University, Guru Angad Dev Veterinary and Animal Sciences University, Oslo University, PVNR Veterinary University, WHO, UNICEF, AMR Global R&D Hub, ReACT, World Animal Protection Organization, among others. These collaborations aim to enhance Patient Safety and Quality of Life in low-resource countries.

An instrumental figure in policy advocacy for AMR One Health and Global Health, Health Equity during India's G20 presidency, Dr. Reddy actively contributed to the creation of white papers and policy advocacy documents.

Beyond his professional roles, he is a recognized leader in the healthcare and pharmaceutical industry, with a global network and hands-on experience in over 50 countries. Dr. Reddy also demonstrates a passion for entrepreneurship, mentoring numerous NGOs, startups, and micro-small enterprises, particularly in the healthcare sector. Additionally, he is a prominent figure in print and visual media, actively engaging in debates, discussions, and interviews.
